

Progress update on BMPs for reducing emissions from operations

Melissa Chin (RSPO Secretariat),
Desi Kusumadewi (RSPO Indonesia Liaison Office (RILO)),
Kuala Lumpur, Malaysia

As part of Workstream 6 of the Greenhouse Gas Working Group 2 (GHG WG2), a questionnaire was prepared and sent out in September 2011 to collect information from RSPO members (growers) on the voluntary actions that are being planned or currently being employed to address and/or reduce GHG emissions. The aim of this exercise is to compile the information provided by RSPO members in order to develop good practice guidance on the different ways to reduce operational GHG emissions.

This presentation serves to provide a summary of the results collected from the 11 companies who responded as well as update on the next steps that will be undertaken to develop the good practice guidance.
